Gao, north of Mali

The northern region of Mali needs your attention. A vast zone in the upper Niger delta and along the Niger river is affected by seasonal floods every year. In this territory, many isolated hamlets are to be found.

Also, the present political turmoil has provoqued important people displacements in direction of neighboring countries.

Help Map the Mentawai Island - highest risk Tsunami Inundation area

We need help to map the Mentawai Island! Its only a matter of time that this area will again suffer from the impact of Tsunami. Indonesia will also be conducting an International Emergency Response exercise at the end of the year and it would be fabulous if OpenStreetMap data is the center of the exercise!

Job: Imagery of Padang

What and Why?

HOT purchased imagery for Padang because only Landsat was available. We would like to digitize all the buildings in the areas as well as roads.

How?

1. Add tile service:

(In JOSM)

- tms:http://aerial.openstreetmap.or.id/padang/{zoom}/{x}/{y}.png
 tms:http://aerial.openstreetmap.or.id/padang2/{zoom}/{x}/{y}.png

(In Potlatch)

- http://aerial.openstreetmap.or.id/padang/$z/$x/$y.png
  http://aerial.openstreetmap.or.id/padang2/$z/$x/$y.png

2.Trace all roads and buildings in the square assigned.

Ready?

[Take a task] Or choose one by **clicking** on the map.

If you're an experienced mapper, you can also be given a task to validate.

Key Requirements for Engagement

- High Resolution Imagery
- Clear Guidelines of "What to Map"
- Information on how the data will be used
- Follow-up on Results
