New Publication : The Power of Partnership

- What are the pros and cons of different models of public-private engagement (PPE)?
- What are the available options of PPE to strengthen the provision of hydromet services?

Models and examples of PPE

Customer (public) – supplier (private) relationship

Financial partnerships for infrastructure projects

Exchange or sharing of infrastructure

NMHS support for new products and services

Cooperation with national and transnational companies

Provision of open data to the private sector

Commercial activities of NMHS
